This project will underground overhead conductors along Benson Boulevard from Denali Street to the Seward Highway. From there the undergrounding will continue south to East 33rd Avenue. This project is a ML&P betterment to upgrade a low ampacity overhead line with a new higher ampacity underground line. Additional clearance conflicts will be resolved through this project. This project is in a target area described in the Title 21 Underground Ordinance because existing overhead lines in the area of Midtown and along Benson Boulevard will be removed.
